

Jonathan Yin

Palo Alto, CA 94306 | joyin@ucsd.edu | +1 (650) 842-0406 | <https://jonathanyin.us>

Education

University of California, San Diego

2020 – 2024

GPA: 3.64 B.S. Major in Mathematics and Computer Science, Minor in Computer Engineering

Relevant Coursework: Object-Oriented Programming, Computer Organization/Systems Programming, Honors Linear Algebra, Advanced Data Structures, Theory of Computation, Design/Analysis of Algorithms, Comp/Design for Digital Systems and Lab, Software Engineering, Programming Languages: Principles/Paradigms, Web Client Languages

Projects

Food Sustainability Research | *HTML, Tailwind CSS, Express, Vue.js, Leaflet*

Jan. 2023 – Present

- Developed an interactive research site as part of the University of California, San Diego's Synthesis Program
- Leveraged Leaflet and Google Maps APIs to build a custom map interface for finding local producers and farms in the San Diego area
- Spearheaded the design and development of site interface and functionality, leading a team of five students

Uber Clone | *React Native, Redux, Tailwind CSS*

Dec. 2022 – Dec. 2022

- Built a Uber-like ride request app for iOS/Android, including commute visualization and dynamic pricing
- Implemented address auto-complete, navigation directions, and an interactive map/UI using various Google APIs

Job Application Tracker | *HTML, CSS, JavaScript, Node.js, Jest*

Aug. 2022 – Dec. 2022

- Built a full-stack web application as part of a 10-person team working in a modern Agile environment
- Developed and maintained a functional CI/CD pipeline using GitHub Actions and other tools
- Followed front-end design mock-ups using proper design implementation practices
- Participated in weekly sprint meetings and standup check-ins; performed code reviews with team members

CS Capstone — Stanford OCR | *HTML, CSS, JavaScript, Node.js, Firebase, Bootstrap*

Aug. 2019 – March 2020

- Developed a web application for text detection and extraction of medical survey data with Google Cloud Vision
 - Utilized Firebase and Node.js for data collection and visualization
 - Improved front-end design and user accessibility with Bootstrap and JavaScript frameworks
-

Experience

Stellantis *Auburn Hills, MI* — ICT Intern

May 2022 – Aug. 2022

- Built a working prototype for taking and display high-resolution screenshots of vehicle models from Autodesk Maya in Unreal Engine 5
- Developed a UI using editor utility widgets in UMG for user input and controls for custom camera dimensions and naming prefixes, utilizing event graphs and dispatchers

Berkeley Pharma Tech *Berkeley, CA* — Software Engineering Intern

June 2021 – Aug. 2021

- Built and published an Android shooter game to the Google Play Store using Unity and C# scripts
 - Designed sprite animations and UI functionality with Unity animation controllers
 - Utilized Azure PlayFab to implement player login system and monitor game performance/analytics
 - Worked with Photon Engine to manage game server hosting and multiplayer functionality
-

Technical Skills

Languages: Java, C++, C, C#, JavaScript, HTML, CSS, SystemVerilog, ARM64, Python

Technologies: Vue, Node.js, Express, React, MongoDB, Firebase, Git, jQuery, Bootstrap, Unity, Unreal
